# Imagine Taking a "Ride" in this SPACE CAPSULE

... as your introduction to the exciting new SCIENCE PROGRAM for 10¢

**YOUR SPACE SUIT** will protect you during an emergency in space. If it "senses" loss of pressure, valve shoots oxygen into suit.

**TODAY'S ROCKETS ARE GIANTS**—yet tomorrow's must be even bigger. It takes 150 pounds of fuel to put one pound of payload into space.

**YOU ARE IN ORBIT** hurtling through space, 150 miles up. You have just endured the fantastic pull of gravity during blast-off. Your descent will be slowed first by rockets, then by parachutes.

**YOU RIDE THIS ROCKET SLED** at 632 miles per hour, then brake to a dead stop to test your ability to stand blast-off.

**YOUR FLIGHT THROUGH SPACE** will be "TRACKED" by antennae like this, which towers higher than a 7-story building.

**Y**OU are strapped in the padded contoured chair in the nose cone of a giant rocket. Through earphones you hear the countdown: "Five . . . four . . . three . . . two . . . one . . . FIRE!"

Suddenly the impact of take-off engulfs your senses. Your body quivers. As the rocket gathers speed, your weight increases ten times, pulling the flesh back from your face.

Minutes later, your weight drops to zero! You are in orbit . . . and weightless!

*And this is just the beginning!* Thanks to this exciting new Science Program, YOU are experiencing Man's first venture into SPACE.

You share the thrilling plans and discoveries of today's scientists as they prepare for this adventure. You explore the problems of food . . . cosmic radiation . . . getting back to earth.

## Enjoy Adventures Like These

Each month this new program will take you on a "guided tour" of a different field of science. One month you will see the marvels of the sea through a bathysphere. Another time the chemist will take you into his laboratory. A biologist will let you look through his microscope. On other "field trips" your guides will be radio engineers . . . submarine commanders . . . medical researchers . . . map-makers . . . nuclear physicists.

Each month you receive gummed, perforated sheets of full-color prints — also a beautiful, richly illustrated album, crammed with absorbing information, and with spaces reserved for mounting the pictures. There will often be interesting extra things-to-

do such as (in the set offered on this page) mounting on a wall chart, full-color gummed punchouts showing the launching, orbiting, and re-entry of a manned satellite.

## A Help in School, and Fun, Too!

This exciting new hobby makes science easy and enjoyable. You'll find plenty of ideas for extra-credit projects in school and it may spark an

interest in a scientific field which can lead to an outstanding career.

**MAIL COUPON NOW** with only 10¢ for the Introductory Science Activity Kit. No obligation. But if you wish to continue you pay only \$1 plus shipping for each month's scientific adventure. You may cancel at any time.
